**FINANCIAL PROVISION OF THE INNOVATIVE ENERGY DEVELOPMENT
OF THE REPUBLIC OF CRIMEA**

The approaches to the financial provision of the innovative energy development in the Republic of Crimea are considered in the article. There are analyzed such issues as the energetic problems of the Crimea and possible ways of its solution, which allow the Republic of Crimea to be energy-dependent on Ukraine and less dependent on energy supply from mainland Russia. The energy potential of the Crimea and possible location areas of the electric power plants on the renewable energy sources are analyzed. The necessary conditions for the development of the alternative energy in the Republic of Crimea are suggested. As a result of the research it is proposed to make the investments into the alternative energy sources in the Republic of Crimea, taking into account global experience.

Keywords: energetics, renewable energy sources, electric power plants, electrical energy, solar energy, wind energy.
