MODERN METHODS OF ANALYSIS IN THE EDUCATIONAL PROCESS

The special value for development and ensuring competitiveness and efficiency of the organizations of various forms of ownership and activity gets a possibility of carrying out the retrospective and perspective economic analysis with use of the most modern tools. It demands the training of specialists of appropriate level and qualification owning various tools and capable to draw competent and valid conclusions on the basis of the received results. The basic directions of the economic analysis, corresponding to modern requirements of managing subjects are considered. The necessity of their application in the educational process is substantiated. The possibility of including various methods of economic analysis of the economic activities of organizations in the working programs of the relevant disciplines is analyzed.

Keywords: economic analysis, business modeling, computer statistical packages.
